Coastal Carolina Receives William A. Kimbel Scholarship Grant

The first scholarship endowment received by a University of South Carolina Center has been made to Coastal Carolina. The pledge was made by William A. Kimbel of Myrtle Beach and Murrells Inlet. The endowment was made to the USC Education Foundation to be used to finance a student's education after completion of his first two years at Coastal Carolina. The funds will be invested and reinvested with the earnings going toward the scholarships. C. Wallace Martin, executive director of the USC Education Foundation, said that a $500 William A. Kimbel scholarship will be available to a Coastal Carolina graduate next September. "The following year the endowment will provide two scholarships," Martin said.

Kimbel, himself said, "To be merely critical of the educational system in South Carolina is not sufficient help. All of us have an obligation to play a part--either by participation in the great effort to expand and improve these facilities or by contributing directly or indirectly to the required courses of these students, every citizen of our area." Kimbel said, "should grant himself the sense of pride which results from viewing the Coastal Carolina Center which is a part of our state university and which serves as impressive evidence of the state's determination to raise our standards of education."

He said he hopes his pledge will serve to remind others of the need for scholarships for deserving students who might not otherwise be able to complete their college education. Students who complete their two years at Coastal Carolina and with academic records that meet the standards are eligible to apply for the scholarship.

Members of the Coastal Carolina faculty will make recommendations to the USC Scholarship Committee. The final decision will be made by the USC Committee.

Martin said since receiving Kimbel's endowment, two individuals have made similar grants to the Baufort Center. In a letter to Kimbel from USC president Thomas F. Jones, the university head said, "One of the principal goals of a great university must be the attraction to the campus of our most promising young people. The William A. Kimbel scholarships which will be established through your gift will not only prove to be a great incentive to students at our Coastal Carolina Center, but also will make our Center the "cream of the crop" over the years to continue their work toward a degree at the University proper."

Stadium Construction Under Way

Funds are now being raised by public donations for an athletic stadium which will cost approximately $40,000. The Coastal Athletic Foundation will build it.

The concrete and steel stands will seat 5,000 people, and the temporary bleachers will seat 1,500.

Included in this stadium will be football, baseball, and softball fields. Also a quarter-mile cinder track.

This stadium will be used for intramural athletics and for physical education. It will be useful to the college as well as to the High School of the immediate area.

Construction will begin during the summer, and should be completed in September of 1964.

The Carolina staff for the Centers edition of the Garnet and Black has been announced and all hands are now grasping a mauling softly in terms of deadlines, proofreading, and uncooperative photographic subject.

Mr. Donald E. Bowers

Mr. Donald E. Bowers, biology professor at Coastal Carolina for the past two years, will not be with us as a member of the faculty next year.

Mr. Bowers attended high school in Charlotte, N.C., and graduated in 1956. He then attended Furman majoring in biology and minoring in chemistry. He graduated pre-med. in 1960. He then went to the University of South Carolina to work on his masters degree.

Now he plans to return to the University of South Carolina and work toward his Ph.D.

Mr. Bowers hopes to enroll in a summer course which involves spending six weeks studying Developmental Biology at the Bermuda Marine Biological Laboratory, all expenses paid. Mr. Bowers said that there he would learn technique, fundamental developmental research, and current progress in the area of Experimental Embryology.

Mr. Bowers relishes during an infrequent moment of contemplation.

Professor: Student

Ed Sullivan and the "Beatles" On TV

Ed Sullivan is noted for being the first to introduce the American public to the well-known personalities from abroad. He did not know that these were the Beatles Singing Nuns. (There was Talent) A few weeks before that he gave us the Beatles. Ed Sullivan is also a very clever business man. He proved it last Sunday when from England he brought "The Beatles". Mr. Sullivan knew that these "musicians" would fill his audience, he thought he could make a success. The fact remains that regardless of how much work is done, it is all useless if students do not attend. If a student brings a date to an activity with the honest intention of having fun he may just achieve that aim. The council coordinated activities are not the only ones which do not receive student participation. The sporting activities receive very little support. In fact, few students attend the sports functions than attend the dances.

The success of social functions, does not rest on one group or one person. It rests on the entire student body. Each individual will do his part, then all activities will be a success.

Letter To The Editor

To many students of Coastal Carolina, the social activities of the past semester were a great disappointment. In fact, the three dances were comparative failures. Where does the blame lie for these failures? Are they caused by the lack of student support? The blame, undoubtedly, does rest on the en­ tire student body. Each individual will do his part, then all activities will be a success. The council plans the activities, the students go into wild spasmodic overactivity. In the case of the activities, the council plans the activities. The students, however, do not support the activities, the council builds the wall and the students do not build it.

In the Harold Amendment

Student Vote Adopts Harde Amendment

January 16, 1963, was a big day for Coastal Carolinist; it marked the end of the heated debate among the students and the mem­ bers of the Student Council over the proposed amendment. It was on that date that the student body voted to pass the amendment. The amendment was proposed by Mrs. Ellen Hardee. Of the twenty-eight students present, twenty voted in favor of the amendment and eight voted against it, thus meeting the required two-thirds majority of students present at the meeting.

The amendment concerned the presence of nonmembers of the Student Council at Student Coun­ cil meetings. It was felt by Mrs. Hardee and, in view of its being passed, by many others at the Center, that nonmembers should be allowed to attend these meetings.

The passage of this amendment means that members of the student body may now attend the previously closed Council meet­ ings. It also marks a giant step forward in the democratic prac­t ices of our school and a more active participation on the part of the students in the school's affairs. We have taken the first step, but, let us not think that our duties end here. We must, in order to make this amendment effective, attend the Student Council meet­ ings. The amendment concerns the presence of nonmembers of the Student Council at Student Coun­cil meetings. It was felt by Mrs. Hardee and, in view of its being passed, by many others at the Center, that nonmembers should be allowed to attend these meetings.

Golf Team Proposed

There has been interest shown around school in the formation of a golf team. This would make another team which the center
Dear Doctor,

What Ails Me?

Dear Dr. Mavillicent,

My girl gives me worries. She hasn't grown any in ten years and lies around all glass-eyed. Distressingly yours,

Snedley Vonetz

Dear Mr. Peel,

I don't know. Got the same trouble myself.

Dear Doctor,

I have become aware of a new group of young stars. They seem to be extremely popular with both the younger and older generation. These new personalities are known as the Beatles. Can you please tell me from where they came?

With lots of love,

Dr. M.

Coastal Basketball Team Leads Centers

The Coastal Center basketball team went to the USC, Field House to play the U.S.C. "Chargers" team in the annual block "C" game and came out on the short end of a 138-30 score. Coach Dwane Morrison's Chargers covered Coastal Carolinas when they had the ball so well that they only made 6 field goals - only 2 in the second half. Seth Williams managed to sink 2 of those and showered in 16 out of 10 charity shots to lead Conway with 14 points.

For the future Gamecocks, who averaged 7" taller than the Coastal squad, outstanding was Gary Gregor with 37 points. The 6' 6" star from South Charleston, West Virginia, was tremendous shooting, guarding, and rebounding. The entire squad was well disciplined on defense and only made a few errors on offense.
