Bibliography of CCU Student Research Presentations, Publications, Performances and Exhibitions 2015-2016

Office for Undergraduate Research

SUMMARY

Undergraduate Research is broadly defined as original research and scholarly or creative work that is conducted by an undergraduate student or team of students, usually with guidance from a faculty or external mentor. It is a process of careful inquiry, methodology, and outcomes leading to the discovery of new information or the generation of creative works. CCU students from all disciplines conduct undergraduate research. It is a powerful learning experience and a clear pathway to success in careers and graduate programs.

This bibliography celebrates the accomplishments of Coastal Carolina University undergraduate students in the areas of research, scholarship, and creative works during the 2015-2016 school year. It is not a listing of all students who took courses in these areas but is instead a listing of significant outcomes from research and creative activities: off-campus or campus-wide presentations, publications, performances, exhibitions, and academic competitions. The time frame covers the Maymester, summer, and fall semesters of 2015 and the spring semester of 2016. The bibliography is arranged alphabetically by the five colleges (College of Science, Edwards College of Humanities and Fine Arts, Spadoni College of Education, University College, and Wall College of Business) and by departments within each college. Entries are listed by student name under the student's major department, even if the research topic or faculty mentor was in a different department. If there are multiple authors, the entry is listed by the name and major of the first author. In multi-authored entries with mixed student and non-student authors, the CCU undergraduate student names are in bold font. If a student is a double major, the entry is listed under the most appropriate major, given the topic and faculty mentor. The exception to this pattern is for performances, in which all student performers were listed under either music or theatre, as appropriate. Though the Honors Program is housed in University College, honors theses and related activities were listed under each honor student's home department (major). Student-authored articles from the student newspaper, *The Chanticleer*, are not included in this bibliography, nor are works from staff writers/photographers for Coastal's *Tempo* magazine, though invited scholarly articles from *Tempo* have been included.

A breakdown of the numbers and categories of undergraduate student research and creative products is described in Table 1. Many of these products were associated with a formal undergraduate research or senior thesis course in which students worked one-on-one with a faculty mentor (over 700 undergraduate CCU students enrolled in an undergraduate research/senior thesis course during the 2015-2016 academic year). However, a number of these accomplishments grew out of traditional courses or extracurricular efforts, as well.

Table 1. Undergraduate Student Research and Creative Products, 2015-2016 Academic Year. The listed numbers of publications and conference presentations do not equate to the number of participating students, as many of these products have multiple co-authors. Totals for all other categories correspond to the number of participating students.

Publications	<u>Number</u>
Peer-reviewed Journal Publications	21
CCU Student Journal Publications (in <i>Bridges</i> or <i>scholarly article in Tempo</i>)	30
Conference Presentations	
Professional/Academic Conference Presentations (off-campus)	108
CCU Campus-wide Conference Presentations ²	279
ADDY Awards (visual arts/advertising)	18
Model United Nations & SC Student Legislature Presentations/Officers/Award Winners	19
Honors or Senior Thesis Presentations/Papers (Departmental)	41
Miscellaneous ³	30
Student Participants in Public Performances	
CCU and/or Professional Musical Concerts and Performances	>55
CCU and/or Professional Theatrical Performances	92

² Undergraduate Research Competition (82), Celebration of Inquiry Conference (189), Eddie Dyer Institute for Leadership and Public Policy Symposium (8)

³ Paul Rice Poetry Competition (7), scholarly articles in *Tempo* (8), juried graphic design competition (1), award winners for the Phi Beta Lambda State Leadership Conference (14)

QUALITY EXPERIENTIAL LEARNING

Undergraduate Research is one of several pillars supporting a foundation of Experiential Learning opportunities for undergraduate students at Coastal Carolina University. In addition to Undergraduate Research, about 2000 students participated in internships and international study-abroad programs during the 2015-2016 academic year. Countless more participated in service learning projects and other designed projects through coursework or extra-curricular activities. Experiential Learning brings education to life!
