Bibliography of CCU Undergraduate Student Research Presentations, Publications, Performances and Exhibitions: 2016-2017

Office for Undergraduate Research

SUMMARY

Undergraduate Research is broadly defined as an inquiry, investigation, or project conducted by an undergraduate student or team of students that generates an original intellectual or creative contribution to the discipline.¹ It is a process of careful inquiry, methodology and outcomes, typically under the guidance of a faculty or professional mentor. CCU students from all disciplines conduct undergraduate research. It is a powerful learning experience and a clear pathway to success in careers and graduate programs.

This bibliography celebrates the accomplishments of Coastal Carolina University undergraduate students in the areas of research, scholarship, and creative works during the 2016-2017 school year. It is not a listing of all students who took courses in these areas but is instead a listing of significant outcomes from research and creative activities: off-campus or campus-wide presentations, publications, performances, exhibitions, and academic competitions. The time frame covers the Maymester, summer, and fall semesters of 2016 and the spring semester of 2017. The bibliography is arranged alphabetically by the five colleges (College of Science, Edwards College of Humanities and Fine Arts, Spadoni College of Education, University College, and Wall College of Business) and by departments within each college. Entries are listed by student name under the student's major department, even if the research topic or faculty mentor was in a different department. If there are multiple authors, the entry is listed by the name and major of the first author. In multi-authored entries with mixed student and non-student authors, the CCU undergraduate student names are in bold font. If a student is a double major, the entry is listed under the most appropriate major, given the topic and faculty mentor. The exception to this pattern is for performances, in which all student performers were listed under either music or theatre, as appropriate. Though the Honors Program is housed in University College, honors theses and related activities were listed under each honor student's home department (major). Student-authored articles from the student newspaper, *The Chanticleer*, are not included in this bibliography, nor are works from staff writers/photographers for Coastal's *Tempo* magazine, though invited scholarly articles from *Tempo* have been included.

¹UGR definition modified from: Wenzel, T. J., "What is Undergraduate Research?," Council on Undergraduate Research Quarterly, 1997, 17, 163.

A breakdown of the numbers and categories of undergraduate student research and creative products is described in Table 1. Many of these products were associated with a formal undergraduate research or senior thesis course in which students worked one-on-one with a faculty mentor (over 700 undergraduate CCU students enrolled in an undergraduate research/senior thesis course during the 2016-2017 academic year). However, a number of these accomplishments grew out of traditional courses or extracurricular efforts, as well.

Table 1. Undergraduate Student Research and Creative Products, 2016-2017 Academic Year. The listed numbers of publications and conference presentations do not equate to the number of participating students, as many of these products have multiple co-authors. Totals for all other categories correspond to the number of participating students.

Publications	<u>Number</u>
Peer-reviewed Journal/Book Publications	11
CCU Student Journal Publications ¹	42
Conference Presentations	
Professional/Academic Conference Presentations (off-campus)	165
CCU Campus-wide Conference Presentations ²	136
ADDY Awards (visual arts/advertising)	10
Model European Union & SC Student Legislature Presentations/Officers/Award Winners	37
Honors or Senior Thesis Presentations/Papers (Departmental)	71
Juried Art Show/Competition	14
Miscellaneous ³	3
Student Participants in Public Performances	
CCU and/or Professional Musical Concerts and Performances	108
CCU and/or Professional Theatrical Performances	103

¹ *Bridges* (7), *Intelligence Review* (22), scholarly work in *Tempo* (13)

² Undergraduate Research Competition (110), Eddie Dyer Institute for Leadership and Public Policy Symposium (8), INBRE/SCoRE Symposium (18)

³ Paul Rice Poetry Competition (2), award winner for the Phi Beta Lambda State Leadership Conference (1), Major of the Year, Society of Health and Physical Educators of America (1)

QUALITY EXPERIENTIAL LEARNING

Undergraduate Research is one of several pillars supporting a foundation of Experiential Learning opportunities for undergraduate students at Coastal Carolina University. In addition to Undergraduate Research, about 2000 students participated in internships and international study-abroad programs during the 2016-2017 academic year. Countless more participated in service learning projects and other designed projects through coursework or extra-curricular activities. Experiential Learning brings education to life!

STUDENT RESEARCH BIBLIOGRAPHY
