Message From Student Health Services

North Carolina college's combat against the measles outbreak is sending hundreds of people to county health departments for immunizations. Fortunately, Coastal students should not fear a measles epidemic on our campus.

Prior to our registration, each student was required to submit immunization records from their doctor. Therefore, if immunization records are current/complete, this should alleviate any apprehension. Doctors, DHEC and medical resources advised Coastal to require immunization records since 1985 to prevent such an event as the North Carolina measles outbreak.

Research indicates that vaccines dated from the mid 1950s to the late 1960s were not effective. According to Bill Nichols, assistant coordinator of the immunization program in the division of health services of North Carolina, "officials are trying to limit immunizations to the most susceptible populations - those 15 months to 32 years old, and those who were immunized prior to 15 months of age or before 1968.

If you have further questions or concerns about your immunization records, contact Kay Kierspe, R.N., in SC-206-I, or Student Health Services, ext. 2329.
