## A Message from the Chancellor . . .

I have been approached recently by a few faculty members regarding memos that have been circulating among the faculty concerning raises in this fiscal year. From what I have been able to determine, there is a lot of confusion and misinformation. I believe that some of the confusion is a result of comparing current salaries with salary data for 1989 - 1990. Because merit increases were given in 1990-1991, almost every faculty and staff member has received a salary increase since 1989-1990.

For 1991-1992, there were only eleven salary increases among unclassified employees. Nine of those were to faculty who had received rank promotions and two were to individuals on annual contracts. No administrator received a salary increase for the current year. Classified staff have not been eligible for merit increases since July 1, 1991, but are eligible for salary adjustments if the S. C. Division of Human Resource Management determines that there have been significant changes in job duties. There have been very few of those this year.

If you have specific questions about any salary issue, I would suggest that you talk with either Dr. Ingle or Dr. Chesson. Ron Eaglin
